## WAVIONIX PROCEDURE DESIGN SOFTWARE

1. ATNS was one of the first customers in Africa to obtain a license to operate the WAVIONIX suite of software. We acquired our first software in 1997, and almost six years later we are still using the upgraded WAVIONIX software version 6.3. We are very satisfied with the performance of the software and the technical support provided by the WAVIONIX experts.
2. We at ATNS can recommend the WAVIONIX software as a practical support for procedures designers that save a lot of time while increasing productivity and precision.

Yours faithfully
